```javascript
//make this code work by changin one line (not replacing the
location of the lines)
const func = () =>{
console.log(i);
}
func();
let i = 1;
```

```javascript
//make this code work by changing the location of the defenition
of the function only
if(true){
    let f = () =>{
        console.log('works')
    }
}
f();
```

```javascript
//what will this code prints out, change one detail to make it
work
for(var i = 0; i<3; i++){
    setTimeout(() =>{
        console.log(i)
    })
}
```
